THE ARTISTRY OF TIMELESS MODERN DESIGNS

*Crafted for Obsession*

**ITZEL**  
RUBINETTERIE

## *THE MUSE OF AESTHETIC SENSUOUSNESS*

The passion for elegance and panache for precision is evident in the perfectly finished designs from our range of faucets, showers, accessories, sanitary ware that leave a signature of opulence and luxury. The seamless union of modern technology and delicate, subtle designs remains the integral part of our offerings to adorn your clandestine space of personal cleansing.

ITZEL is the personification of indulgence at its best.

With amazing yet the rare feelings of sensual gratification, we bring the harmony of sophistication and practical solutions with the touch of refined luxury for your home. Be a part of our endeavour for evocative design that speaks volumes of your taste in splendour and extravagance.

**ITZEL**  
RUBINETTERIE

## Manufacturing :

### Induction Casting of Brass:

Made from brass ingots of high purity, density and superior grain structure, our products follow a streamlined process in the induction casting of brass as per international standards to achieve the perfect finish. Focused on quality for manufacturing an extremely reliable product, we ensure uniform wall thickness by the process of 'core shooting' on the brass ingots before casting. This ensures the uniform flow of water inside a faucet and the ultimate sensual feel of replenishing your skin with gentle swirls.

### Machining:

Made from extruded brass rods, all our product components are processed on precision machines which makes it standardized and easy to replace. The hardness and workability make brass one of the most versatile machining materials available, making it possible to achieve an impeccable mirror-finish with sensual and exotic contours that add elegance and a tinge of luxury in every fragment of our design. The muted golden-yellow color of brass is refined to its finest by the use of imported brushing tools at our dedicated facility and ensures a long lasting life.

### Polishing / Grinding:

Polishing/Grinding is done on very advance machines to provide mirror smooth finish which is essential for perfect surface coating.

### Surface Finishing (Electroplating, Powder Coating and Paint)

- a) NICKLE PLATING 'Latest ultrasonic cleaning system is used for cleaning and degreasing the product before electroplating. The thickness-of nickle is 10 to 12 microns as per international standards.
- b) CHROMIUM PLATING: Quality chromium plating system which is copper based is used for giving the best surface shine having very resistance against corrosion. Chrome thickness is 0.3 microns.

### Research and Development:

The company has an in house market oriented Research and Development department which is constantly innovating and developing newer products. The focus of our research is to produce bathroom utility products catering to diverse needs of our customers. The department has three main division

- (A) Designing is done by technical and professionally qualified designers and experts, on sophisticated CAD/CAM system, which allows a level of design which is in continual evolution and able to satisfy the most varied requirements and requests.
- (B) Die Tool Room: Special purpose equipment like spark erosion machines is used for making master dies and other tools used For manufacturing bathroom fittings and accessories
- (C) Laboratories: Separate laboratories are operational for testing of raw materials, chemicals, surface coating, water pressure, etc

DESIGN, QUALITY & TECHNOLOGY

## DISCOVER THE ITZEL EXPERIENCE

ITZEL range of products is the amalgamation of carefully engineered design from boundless imagination that blends in style and intricate architectural details to make your daily rituals, a captivating experience. Every drop that swirls and pampers your skin is the result of cutting-edge technology and immaculate precision to achieve that voluminous flow of clear, vibrant yet gentle stream of water that makes you leave your stress behind.

Soft Water Flow

Metal Creations  
from Honey Brass Metal

Higher Durability

100% Factory Tested

Operates Smoothly

Advanced Water  
Saving Flow Regulator

Higher Longevity

All products carry 10 years warranty  
against any manufacturing defects.

All products carry 10 years warranty against any manufacturing defects.

Driven by a basic belief that its products must make friends not just consumers, ITZEL has initiated a major exercise in consumer education. The company's trained executives maintain a direct interface with consumers, educating them about the product quality, convenience and maintenance. ITZEL also believes that consumers must get the best out of its products. Hence it has evolved a set of consumer guidelines. These guidelines, when followed, ensure optimum and trouble-free performance of ITZEL products for years to come.

The guidelines are :

- Keep the number of bends in the pipelines to a minimum and make it travel straight and vertical as far as possible. More than required number of bends throttle the pressure of water.
- All the supply lines must have vent pipes. These vent pipes help in removing air-locking in the water supply to give a smooth flow of water from the fittings.
- Test the working of all the concealed fittings installed on a high pressure for leakage before plastering or fixing the tiles.
- Clean the aerators provided in the items at regular intervals for a perfect foam flow of water from the fittings.
- Place the outlet point in the overhead tank at least 25cm above the ground level of the tank. This prevents the flow of foreign particles, sand etc., along with water supply into the fittings and thereby preventing the possible damage to the working parts. Clean the tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular interval to avoid deposition of foreign particles.
- Clean the fittings regularly with normal soap or chalk powder to remove scaling/stains. Do not use strong detergents as this may cause damage to the chromium finish provided in all Ceramix products.
- Do not use harsh cleaning agents containing abrasives and acids, instead use a soft sponge or wet cloth with soapy water / diluted vinegar to protect the colour coated finish.
- To protect the fine finish of fittings from dirt stains and other damages, cover them with cloth / polypack after their installation till they come into actual use.
- Please buy ITZEL products from company's authorised dealers only to ensure genuine quality material.
- Insist on genuine spares from company's local service centre or its authorised stockist in case of any repair or replacement.
- Please strictly follow the instructions manual whenever provided for individual items in their packing boxes for their correct installation & maintenance.
- Look for ITZEL seal on all ITZEL products.
- For any type of technical or service assistance, please contact the nearest ITZEL branch office, area representative or dealer.
